

## RESIDENTIAL ELECTRIC VEHICLE (EV) SMART CHARGER REQUIREMENTS & INSTRUCTIONS

Richland Energy Services offers a \$300 rebate to residential customers who purchase and install an Energy Star® Level 2 EV charger. Limit one (1) rebate per residential account.

### REQUIREMENTS:

1. Be a Richland Energy Services (RES) customer and homeowner where the charger will be installed.
2. Purchase an Energy Star® Level 2 (240 V) smart charger for your all-electric vehicle. (Hybrid vehicles do not qualify.) Smart charger MUST:
  - be on the [Qualified Products List](#) and have “time-delayed” or “scheduled” charging capabilities.
  - be installed on or after January 1, 2021.
3. Install the smart charger using a licensed electrician and have all necessary permits and Labor & Industries inspection completed.
4. Set charger to operate during RES light load hours, Monday–Saturday 10 pm-6 am and Sunday all day.
5. Agree to allow RES onsite inspection to verify charging installation if requested.
6. Rebate cannot exceed the cost of charger and installation.

**SUBMIT** the following information with your [Incentive Application online](#):

- Completed *Incentive Application for Residential EV Smart Charger*
- Photo or PDF showing selected EV Charger Model No. is on the Energy Star Level II Smart Charger Qualified Product List (see link above)
- Photo of the installed EV Charger
- Photo of Charging Schedule
- Equipment or Contractor invoice showing Invoice Date, Installation Cost, Model No., Type, and Quantity
- L&I Permit and passed Inspection Report
