

HIGH-PILED COMBUSTIBLE STORAGE Owner's Statement of Intended Use

Address: _____ Bldg No. _____
Tenant: _____ Phone: _____
Owner: _____ Phone: _____
Gross Bldg Area: _____ Designated Storage Area: _____

The Richland Fire and Emergency Services Department's review of this project indicates there is a potential for it to be used for high-piled combustibile storage as defined by the International Fire Code. If this is the case, special fire protection features may be required beyond those specified in the regular plan review.

Please check the appropriate box below, sign and return this form to the Richland Fire Marshal's Office at the address listed below. If you have any questions, please contact (509) 942-7703. If additional protection features are required, you will be notified.

- This building will not be used for high-piled combustibile storage as determined by the International Fire Code:
 - Storage in piles or on pallets, in racks or shelves where the commodity will not exceed 12 feet in height, or,
 - Tires, Group A plastics, flammable liquids, idle pallets or similar high hazard commodities will not be stored above 6 feet in height.

- This building will be used for high-piled combustibile storage, and will be designed to conform to International Fire Code requirements. A fire department permit is required. **NOTE: If you checked this box, complete Page 2 of this form.**

- This building is a speculation building without a tenant at this time. The tenant will be notified there may be special fire department requirements for high-piled combustibile storage, and will be advised to contact the fire department for permits prior to occupancy.

HIGH-PILED COMBUSTIBLE STORAGE Owner's Statement of Intended Use

Address: _____ Bldg No. _____

Please answer all questions. The detail of the description will help establish your warehouse and commodity classification.

Mixed commodity classifications must be protected to the highest commodity classification unless it can be shown by engineering analysis the fire protection equipment can protect the hazard.

1. Describe the commodities to be stored. Provide a detailed description of the product(s), packing materials and containers. Products that are packaged with Group A expanded or unexpanded plastics should be described with the amount of each plastic by weight or volume.

2. Describe the method of storage. Provide a description of the method of storage such as in solid piles, on racks, on pallets, loose, mixed, etc.

3. Specify the amount of area designated for high-piled storage. _____ Sq Ft

4. Specify the maximum height of the storage. _____ Ft

5. Are any commodities stored on plastic pallets? YES NO

Return this form to:

Richland Fire Department
Fire Marshal's Office
1000 George Washington Way, Richland, WA 99352 ~or~
Fax (509) 942-7575 or e-mail fireprotection@ci.richland.wa.us

This information will be used to classify your commodity and your storage areas to establish the fire protection requirements for high-piled combustible storage.
